ODA – Oilfield Driver Awareness – Energy Safety Canada

8 Hours

Certificates are valid for 3 years.

Prerequisites:

- Government Issued Photo I.D.

The Oilfield Driver Awareness course replaces two courses previously offered by Enform (General Oilfield Driver Improvement (GODI) and Light Duty Vehicle (LDV)).

The Oilfield Driver Awareness Course is focused on developing effective driver behavior and attitudes, helping drivers maintain an attitude of safety when they are behind the wheel. The updated material had less emphasis on technical driving instruction.

Each person attending the course will be advised on:

- Developing a Professional Driving Attitude
- Understanding and Dealing with Personal Limitations (Physical and Mental well being)
- Driving Proactively-How to be a Defensive Driver
- Responding to Changing Road Conditions
- Developing Emergency Response Plans
- Performing Safety Inspections
- Planning for the Journey
- Controlling Exposure to Hazards

The Oilfield Driver Awareness certificate is equivalent to the General Oilfield Driver Improvement or Light Duty Vehicle certificate. Provincial agencies are aware of the updated course offering and will be accepting the Oilfield Driver Awareness certificate as a replacement of the GODI or LDV certificate.
